

BUG ID: BUG_003

Title: Cart total does not recalculate after quantity is updated

Module: Shopping Cart

Severity: High

Priority: High

Environment: Windows 11 Google Chrome (Latest Version)

Preconditions: User has a product in the shopping cart with quantity set to 1 and a unit price of \$20.

Steps to Reproduce: 1. Navigate to the shopping cart. 2. Verify the product quantity is 1. 3. Verify the cart subtotal is \$20. 4. Change the product quantity from 1 to 3. 5. Update the cart if required. 6. Observe the cart subtotal and total.

Expected Result: The cart subtotal and total should recalculate based on the updated quantity. A product priced at \$20 with a quantity of 3 should produce a subtotal of \$60.

Actual Result: The product quantity updates to 3, but the cart subtotal and total remain at \$20.

Frequency: 100% Reproducible

Status: Open
