

BUG ID: BUG_004

Title: User remains authenticated after logout and can access protected account page

Module: Authentication / Session Management

Severity: High

Priority: High

Environment: Windows 11 Google Chrome (Latest Version)

Preconditions: User has a valid account and is logged into the application.

Steps to Reproduce: 1. Log into the application using valid credentials. 2. Click the Logout button. 3. Navigate directly to a protected URL (e.g., /account). 4. Observe the system response.

Expected Result: The user session should be terminated after logout. Access to protected pages should be denied, and the user should be redirected to the login page or shown an authorization message.

Actual Result: The user can still access the protected account page after logging out.

Frequency: 100% Reproducible

Status: Open
